

In the United States, unintentional injuries are the leading cause of death in children, adolescents, and adults younger than 45 years.

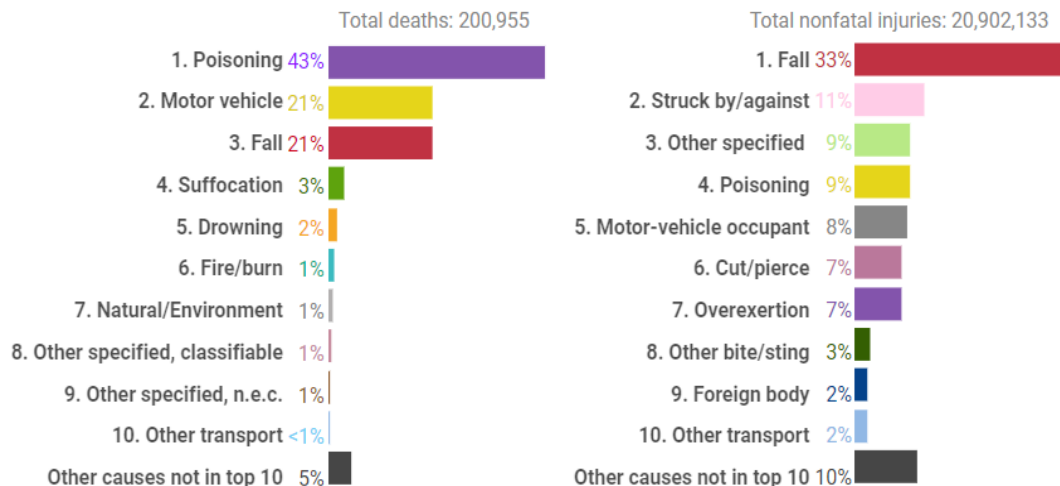

Child unintentional injury death rates were highest among:

- Male children
- Babies under 1 year old
- Teens age 15–19 years

Major cause of unintentional injury death include:

- Drowning (the leading cause for children age 1-4 years)
- Suffocation
- Motor vehicle crashes
- Poisoning

Top 10 preventable injuries, United States, 2020

- Stay in the kitchen when you are cooking on the stove top for safety.
- Stay in the home when cooking your turkey, and check on it frequently.
- Keep children away from the stove. The stove will be hot and kids should stay three feet away.
- Make sure kids stay away from hot food and liquids. The steam or splash from vegetables, gravy or coffee could cause serious burns.
- Keep knives out of the reach of children.
- Be sure electric cords from an electric knife, coffee maker, plate warmer or mixer are not dangling off the counter within easy reach of a child.
- Keep matches and utility lighters out of the reach of children up high in a locked cabinet.
- Never leave children alone in room with a lit candle.
- Make sure your smoke alarms are working. Test them by pushing the test button.
