

Be on the lookout for this band when patients seek care in a clinic office, urgent care, Emergency Department or call EMS for assistance. Do NOT CUT OFF BAND if still in 6 weeks window.

Patients with preeclampsia or severe hypertension are instructed to wear this band for 6 weeks after discharge or until their 6 week follow up appointment with their OB provider.

This band helps patient and their family remember to tell health care providers that they recently had a baby.

This band helps health care providers to instantly recognize that this patient is at risk for preeclampsia and promotes more timely and appropriate care.
