

October Cyber Security Month

PROTECT YOUR ACCOUNTS. PROTECT YOUR MONEY. PROTECT YOUR INFORMATION.

Cyber security isn't just for businesses or technology experts. Every time you use your phone, bank online, play a game, shop, or use social media, you're protecting digital information.

GAMING

- Use a unique password for your gaming account.
- Turn on multi-factor authentication when available.
- Be cautious of messages offering free games, skins, currency, prizes, or exclusive items.
- Don't share your password or verification codes with other players.
- Be careful with links sent through gaming chats and communities.

BANKING & MONEY

- Never share your verification code with someone who contacts you unexpectedly.
- Scammers may pretend to be your bank and claim there's a problem with your account.

(If you're concerned, contact your bank directly using the number on your card or through its official app or website.)

SOCIAL MEDIA

- Review your privacy settings.
- Be careful about what personal information you post publicly.
- Don't click unexpected links in DMs.
- Watch for fake profiles pretending to be friends, businesses, or organizations.
- Be skeptical of investment opportunities, giveaways, and deals that seem too good to be true.
